

VENNAPUSA GIRIVARDHAN REDDY

AI & Web Developer | Machine Learning & Computer Vision Enthusiast

Simhadripuram, Pulivendula, Kadapa, Andhra Pradesh – 516454

Phone: 8639616977 | Email: girivennapusa8@gmail.com | LinkedIn: <https://www.linkedin.com/in/girivardhan-reddy>

GitHub: <https://github.com/Girivardhan-Reddy>

Professional Summary

Results-driven Computer Science graduate with expertise in Artificial Intelligence, Machine Learning, Computer Vision, and Full Stack Development using Python, Flask, TensorFlow, and PyTorch.

Completed 10+ academic and freelance projects, leveraging APIs, automation tools, and modern frameworks to build scalable, efficient, and user-focused applications.

Strong problem-solving mindset with the ability to design, develop, and deploy end-to-end solutions, with a passion for applying emerging technologies to real-world challenges.

Education

Bachelor of Technology (B.Tech) – Computer Science and Engineering

Kalasalingam Academy of Research and Education (KARE), Tamil Nadu, India

CGPA: 7.55

2022 – 2026

Intermediate (MPC)

Sri Chaitanya Junior College, Tirupati, Andhra Pradesh, India

Percentage: 75.3%

2020 – 2022

Secondary School Certificate (SSC)

Sri Vivekanandha High School, Kadapa, Andhra Pradesh, India

Percentage: 96.6%

2019 – 2020

Projects

AI Resume Analyzer

Tech Stack: Python, Flask, Streamlit, SpeechRecognition, pyttsx3, OpenAI API

Live Demo: <https://resume-analyzer-3-m92z.onrender.com>

- Developed an AI-driven web application to evaluate resumes against job-specific requirements using NLP techniques.
- Integrated voice-based mock interviews with real-time feedback and response analysis.
- Implemented webcam-based emotion detection to enhance candidate assessment and interaction.

AI-Powered Oral Cancer Detection System

Tech Stack: Python, Flask, PyTorch, OpenCV, Torchvision, CNN, Grad-CAM, FPDF, PIL, SMTP

GitHub: <https://github.com/Girivardhan-Reddy/AI-Powered-Oral-Cancer-Diagnosis>

- Built a deep learning-based diagnostic system to detect oral cancer from medical images.
- Utilized advanced CNN architectures (EfficientNetV2, ConvNeXt) to improve classification accuracy.
- Implemented Grad-CAM for explainable AI, highlighting critical regions in predictions.
- Automated PDF report generation and enabled secure email delivery of results.
- Applied image preprocessing techniques to enhance model performance and reliability.

Recipe Recommendation System

Tech Stack: Python, Flask, Machine Learning, APIs

Live Demo: <https://recipe-recommendation-keia.onrender.com>

- Developed a recommendation system to suggest recipes based on user preferences and available ingredients.
- Implemented intelligent filtering and ranking techniques to provide personalized suggestions.
- Integrated APIs for dynamic data retrieval and real-time recommendation updates.
- Designed a user-friendly interface for seamless interaction and improved user experience.

Skills

Programming Languages: Python, Java

Web Technologies: HTML, CSS, JavaScript

Frameworks & Libraries: Flask, Streamlit

AI / Machine Learning: TensorFlow, PyTorch, CNN, OpenCV, NLP

Tools & Platforms: Git, GitHub, Backendless

APIs & Integration: OpenAI API, REST APIs, API Integration

Databases: MySQL, SQLite
